

## Ensymm IV-Warmer

Ensymm now offers also an IV-Warmer.

smart - simple- safe

Advanced technology: One-touch-control

The ensymm e-line warms blood products and infusions up to the patient.

The electrically heated and single-sided opening heating device is capable of accepting standard IV-sets.

The ensymm e-line is simple to operate in all medical departments.

It is extremely easy to clean due to its smooth surface.

Its large and flexible application areas at low to medium flow rates results in an optimum alternative to cost-intensive blood heaters with single-use articles.

Your benefits at a glance:

- integrated temperature sensors guarantee best warming and highest safety
- Complete casing of IV-sets and therefore optimum warming
- No additional consumer articles
- Warming of return feeds or of dialysis fluids in combination with devices for replacement kidney therapy
- Warming of enteral and/or parenteral nutrition
- available in various internal diameters
- Smooth surface, therefore simple to wash and disinfect

### Product data's

Type:	Ensymm e-line
Temperature setting:	39°C setpoint temperature ex-works
Heating profile length:	1.500 mm
Internal diameters available:	4.30mm 6.55 mm
Weight:	approx. 1.300 g
Mains supply:	100 - 240 V, 50/60 Hz
Connection:	24 volt DC
Connecting cable:	3 m
Safety class:	I protective ground Degree of protection BF external and internal application to patients with insulated application parts
Humidity protection:	IP X2
Certification:	CE

Made in Germany
